

Easy-to-use Cartridge

Yashica atoron uses a factory-loaded Atoron X film. Or other films for the Minox camera. Although it's a small negative, you can enjoy full size pictures.

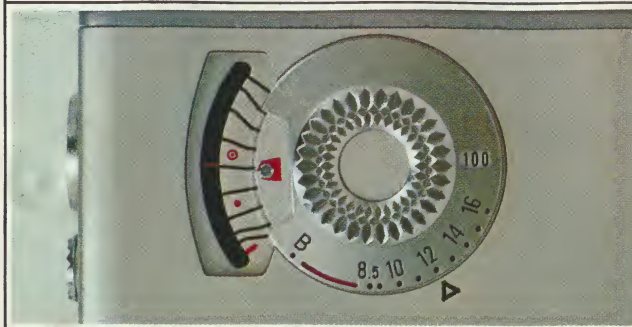

Drop-in Loading

Just snap in a film cartridge. That's all to film loading. No film threading. No double exposures. No rewinding.

Match-needle Exposure Control

Set the ASA speed. Aim the camera at your subject. Align the follow-pointer to the needle. Advance the film. Shoot!...without any fuss.

Accessories :

The Atoron Kit includes camera, leather case, filters (ND 4X & 80B) flashgun and chain.

To enhance the versatility of the camera, the following aids are available: Tripod Set including mini-pod, cable release, adaptor and leather case. Also: Right-angle finder and Close-up lenses.

Features :

- *Yashinon 18mm f/2.8 fixed-focus lens
- *Programed shutter coupled to EV 8.5—16 (1/45 to 1/250 sec.)
- *Bright viewfinder (0.63X) with parallax correction frame
- *Selenium exposure meter with ASA range of 25 to 400
- *Film—Minox size cartridge loading
- *Pull-lever advances film, cocks shutter, sets exposure counter and prevents double exposures
- *Measures 103×33.5×18.0mm and weighs 120 grs.
